**YOUR
NATURAL
CHOICE**

**YOUR
NATURAL
CHOICE**

Our engineering team uses a unique process to create an environmentally friendly line of *Organic Soil™* products that are specially designed to increase the health and happiness of your plants. Only materials selected by our engineers are used in our process so that we can guarantee a quality product.

Organic Soil™ products are ideal for landscaping, planting beds, flower gardens, vegetable gardens, lawns, and container gardening.

Organic Soil™ products are tested by independent laboratories. Our NatureMade Compost is a **Category “A” compost**. It meets the federal government Canadian Council of Ministers of the Environment (CCME) standards, and is **Ecologo™ certified**, which means it can be used in any application.

WHAT ARE SOME BENEFITS?

- ✔ Provides Organic Matter
- ✔ Has Higher Nutrient Levels than Peat Moss
- ✔ Improves Water Retention
- ✔ Acts as a Slow Release Natural Fertilizer
- ✔ Controls Erosion
- ✔ Improves Soil Aeration for Root Development
- ✔ Heating Process in Composting Eliminates Weed Seeds
- ✔ Encourages Healthy Plant Growth

WHAT PRODUCTS ARE AVAILABLE?

✔ **NatureMade Compost:** This product is designed to provide essential nutrients, organic matter and increase workability of existing soil.

Use: Apply 1/2 inch (1.25 cm) layer to topdress lawn. For planting, add 2 to 4 inches (5 - 10 cm) to existing soil and work in where possible.

✔ **RootZone Landscape Blend:** A “plant ready” soil that is specially formulated with compost and fine wood mulch to produce a virtually weed free product.

Use: flower beds, pots, or soil base for sod

✔ **Premium Lawn Mix:** A custom blend of premium compost and topsoil to promote vigorous lawn growth.

Use: soil base for sod

✔ **NatureCover Mulch:** An all purpose aged bark mulch that offers excellent landscaping and soil enhancement value. Available in different sizes. NatureCover provides a natural barrier for weeds, improves water retention and provides erosion control.

Use: Apply 3 to 5 inches (7.5 - 12.5 cm) to soil surface of garden beds and pathways.
